DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 and 15, drawn to a method of modeling a directed evolution protocol and system, classified in at least class 702, subclass 20, for example.
- II. Claims 11-13, drawn to nucleic acids, vectors, and host cells, classified in class 536, subclass 23.1.
- III. Claim 14, drawn to proteins, classified in class 530, subclass 350.

The inventions are distinct, each from the other because of the following reasons:

The products of Groups II and III can be shown to be distinct because they are structurally distinct products. Each of these products can be shown to be distinct from the method of Group I because if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the products of Groups II and III could occur naturally and/or be identified by other methods. Product by process claims are examined as products irrespective of the method by which they are made.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1631

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
